Cover Letter for Data Analyst Position

Dear Sir/Madam,

I am writing to apply for the Data Analyst position at your organization. I graduated with a degree in Civil Engineering in 2020 and have worked in the field for the past five years. During this time, I gained valuable professional experience, developed strong problem-solving abilities, and learned the importance of accuracy, planning, and analytical thinking.

During my work experience, I developed a strong interest in data handling, problem-solving and making decisions based on insights. Over time, I realized my greater interest lay in analytical tasks rather than core site execution work.

This motivated me to transition into Data Analytics. I have built my skills in Excel, SQL, Power BI, and Python and am eager to contribute my skills and experience to your organization. I am highly motivated to begin this new chapter in my career and contribute positively to your organization. I would be grateful for the opportunity.

Please find my resume attached for your consideration.
